

Checking you student's Smart Music Assignments

One of the advantages of Smart Music is that parents can see and here their students work from any computer. The following are the instructions for doing so:

1. Go to www.smartmusic.com/impact
2. Have your student log in with their user name and password
3. Select the students primary class
4. Select the current grading period

You will see a list of the Smart Music assignments. The completed ones will have one or two grades listed, assessment and recording. The icons after the grade are for listening to the actual assignment and to see a snap shot of the test. Assignments that are recordings only will not have a snap shot. The next two columns are the due date and the submit date. If an assignment is late, it will appear in red.

The great thing about this is that the grade book is internet based and can be accessed form any computer. If you have any questions, please contact Mr. Dodd
